TEACHING POSITIONS

EXTRA ACADEMIC
The last two years I have been giving Sociology classes at an institution for the general public. The responses of the students and staff have been very positive and the experience of teaching has been personally very grateful. I see it as a possibility to put research questions into play and to probe the general feeling that sociological research has for a wider public.

Over the past 4 years I have given a number of Workshops on Running. I instruct on the Technique ChiRunning, and have traveled through the country assisting runners of various levels, from beginners to advanced. Which favors my research purpose, on ultrarunning.

Additionally, as a native american living in Argentina I have given conversation classes in English, for scholars and the general public, with a range of academic students ranging from philosophy, to tourism and biochemistry.
